VIRAL HEPATITIS JOURNAL

## EDITORIAL

From the Editor,

Since we will apply to PUBMED Central, starting from this issue, our journal will be in English.

As you all know, viral hepatitis, especially chronic hepatitis B and C are endemic in the world and studies, researches regarding their prevention and treatment are ongoing, increasing day by day. In recent years, the developments on the treatment of Chronic Hepatitis C are on the rise and it is getting harder and harder to keep up with the latest developments.

Our aim is to have an open access for our journal so that everybody can hear and learn about all the latest developments. In line with this, we expect your contributions with your articles, case reports, reviews, and letters to editor.

**Prof. Dr. Fehmi Tabak**
